CMAT ADVANTAGE · FOR PRACTICE MANAGERS

What CMAT testing means for your front desk

Your physician is looking at adding CMAT Advantage testing. Here is what it means for the people who run the office day to day.

8 to 10 min
per test, start to finish

0 new hires
your existing staff run it after a short training

Same day
results on the chart and the superbill

A TESTING VISIT, START TO FINISH

1

Before the visit

The patient completes a short symptoms questionnaire, so your team confirms testing is appropriate before booking the time.

2

The test

About 8 to 10 minutes, run by a medical assistant or technician after a short training. No new hire needed.

3

Results

Recorded in the chart and on the superbill the same day, so your billing team has what it needs.

4

Follow-up

The result sets the next recheck, which drops onto the schedule like any other follow-up visit.

YOUR QUESTIONS, ANSWERED

Do I need to hire anyone?
No. Your existing medical assistants or technicians run the test after a short, HealthWright-led training.

Will I be chasing supplies?
No. Supplies are readily available and simple to reorder when you run low.

What does setup involve?
Device setup and staff training are handled by HealthWright. Most practices name one person as the in-office program lead.

How much time does it add?
Plan on a set block of about 8 to 10 minutes per test. The pre-visit questionnaire keeps the day from backing up.

What about billing and the codes?
Results are recorded on the superbill the same day. When testing is clinically indicated and documented, it bills under CPT 93923 for the upper and lower extremity ABI studies and CPT 95921 and 95923 for autonomic testing. Have your biller confirm coverage under your Medicare contractor's LCD. Bring your biller's questions to the demo.

Who do we call for help?
HealthWright provides ongoing support that continues well after the first month. Reach the HealthWright team by phone or email whenever questions come up.

FOR A SMOOTH ROLLOUT

Name a program lead. One person owns scheduling the tests and keeping supplies stocked.

Train early. Get your assistants into the HealthWright training before the first patient.

Keep the line open. A quick call to support clears most first-week questions.

See a testing visit end to end in a 25-minute demo.

Bring your office manager on the call. **contact@healthwrighttechnologies.com** · **(706) 460-2633**

HealthWright Technologies · Mansfield, GA. This overview describes typical in-office workflow and is general information for practice planning, not clinical, billing, or coverage guidance. Confirm coding and coverage with your Medicare contractor and billing team.
