HealthWright Technologies, Inc.

Capability Statement

U.S. medical-distribution company · point-of-care diagnostic testing programs for government and civilian health facilities

CORE COMPETENCIES

- **CMAT Advantage System:** a non-invasive, in-office point-of-care testing platform measuring ankle-brachial index (ABI), toe-brachial index (TBI), sudomotor function, and heart-rate variability (HRV). Built on the TM-Flow device from LD Technology, using FDA-cleared (510(k)) component devices.
- **Turnkey program delivery:** site installation, staff training, structured implementation, and ongoing U.S.-based support.
- **Results management:** test results and reports are generated on the CMAT system in the office.
- **Consumables and resupply:** recurring supply fulfillment (electrodes, mouthpieces) for the installed base.

DIFFERENTIATORS

- Veteran-owned small business.
- A complete assessment takes about 8 to 10 minutes and can be performed by a medical assistant, with minimal disruption to clinic flow.
- ABI, sudomotor, and HRV measurements correspond to established CPT codes 93923, 95923, and 95921; practices confirm coverage criteria under their Medicare Administrative Contractor's LCD.
- 90-day buyback policy for facilities that bill Medicare: where the tests are billed correctly and compliantly and Medicare does not reimburse them, HealthWright buys the system back. Adoption is structured rather than open-ended, and implementation is managed by HealthWright's team.
- ABI and TBI are established measures of lower-limb arterial circulation used in evaluating peripheral arterial disease (PAD); sudomotor function and HRV are measures of autonomic function. Testing supports the clinical evaluation of symptomatic patients.

PAST PERFORMANCE

CMAT Advantage systems are installed and supported in independent medical practices across the United States. HealthWright Technologies delivers implementation, training, and ongoing support for the systems it places. These installations are commercial; HealthWright is newly registered for federal contracting, and commercial references are available on request.
